

# Recent progresses on loop-erased random walk in three dimensions

Xinyi Li (Peking University)

2020/04/29

## **Abstract**

In this talk, we will give a brief introduction to the model of Loop-Erased Random Walk (LERW), and discuss some recent progress on this model in three dimensions, including one-point function asymptotics and scaling limit in natural parametrization. These are joint works with Daisuke Shiraishi (Kyoto University).
